

MICHAEL DUNHAM

EMPLOYEE OF THE YEAR

2016

Michael began his employment at Willow Run Foods in June of 2006 as our PC/LAN technician. His responsibilities included cleaning and maintaining the health of our PC, Server, Fax and Printing equipment. Over the years, Michael has provided a wealth of expertise and willingness to go above and beyond expectation.

Michael researches new technologies and provides extremely thorough documentation for any project in which he is involved. His implementation of plans and preparation make moving technologies into production a breeze.

Michael also monitors other aspects of our environment from disk space allocation to server performance. Using statistics and trends, he proactively suggests modifications so that possible hindrances are avoided or minimized.

IT can provide very interesting and sometimes stressful situations. When those situations arise, there is absolutely no one we would rather have in our corner addressing those challenges. He will not only address the challenge whole-heartedly, but will do so with a smile on his face.

Understanding the complex nature of IT infrastructure and having an ability to work with a myriad of technologies, makes Michael a true asset to the Willow Run Family.

Beyond Michael's technical abilities, his "average" personality is enjoyable and witty. We really appreciate all he does and would like to honor him as **EMPLOYEE OF THE YEAR.**
